SUMMARY

Detail-oriented Software Developer with a strong academic foundation in Object-Oriented Programming, Web Development, and Database Systems. Experienced in building full-stack applications using React.js, Node.js, .NET, and MongoDB. Passionate about solving real-world problems through clean, maintainable code. Known for adaptability, collaboration, and continuous learning in team-based environments.

SKILLS

Programming Languages:

JavaScript, C#, Python, R, SQL

Frontend:

React.js, HTML5, CSS3, JavaScript, EJS

Backend & Frameworks:

Node.js, Express.js, .NET, REST API development

Databases:

MongoDB, MySQL, PostgreSQL, Database Design, SQL Queries

Tools & Platforms:

Git & GitHub, Jupyter Notebook, Power BI, RStudio, Visual Studio Code

Software Concepts:

- Software Engineering
- Database Systems
- Data Structures and Algorithms
- Programming Languages
- Web Development
- Systems Analysis and Design
- Object-Oriented Programming (OOP)
- Functional Programming

EDUCATION

Belgium Campus iTversity

Bachelor of Information

Technology – Specialisation:

Software Development

(2023-2025)

Coursework:

- Programming (JavaScript, C#, Python, R)
- Software Engineering, Web Development, Cloud-Native App Architecture
- Artificial Intelligence, Machine Learning, Data Analytics
- Database Development (SQL, MongoDB, ERDs)
- Project Management, Systems Analysis & Design
- Business Intelligence, User Experience Design

PROJECTS

Jobsta - Youth Job Alert Web App (in progress):

Tech Stack: React.js, Tailwind CSS, Node.js, Firebase (Twilio integration planned)

- Developed a WhatsApp-integrated job alert platform focused on unemployed youth in South Africa.
- Implemented React-based user interface and backend architecture to manage user data and job matches.
- Designed scalable notification system and database schema to improve job delivery accuracy.

Personal Portfolio Website

Tech Stack: HTML5, CSS3, JavaScript, GitHub Pages

CERTIFICATIONS

- Responsive Web Design – FreeCodeCamp (2023)
